DETAILED ACTION

Response to Amendment

1. The examiner acknowledges the applicant's submission of the amendment dated 1/20/2006. At this point, claims 1, 4-5 and 9 have been amended, claims 10-16 have been canceled. Claims 1-9 are pending in the instant application.

Response to Arguments

2. The applicant has argued that Chakrovorty in view of Farooq are silent with respect to an integrated circuit package comprising first and second capacitor structures formed directly on the upper and lower sides of the base structure respectively, each capacitor structure including conductive power and ground planes and a dielectric layer, having a high-k value, between the power and ground planes, the power and ground planes being electrically connected to at least one of the power and ground vias, respectively. The examiner finds this argument persuasive. Therefore, the examiner made decision to allow this limitation over the prior art of record.

Allowable Subject Matter

3. Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1 and 5, the prior art alone or in combination does not teach the limitation of an integrated circuit package comprising first and second capacitor structures formed directly on the upper and lower sides of the base structure respectively, each capacitor structure including conductive power and ground planes and a dielectric layer, having a high-k value, between the power and ground planes, the

power and ground planes being electrically connected to at least one of the power and ground vias, respectively.

Claims 2-4 and 6-9 are variously depend on claims 1 & 5, they are allowed for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
